## Project's Introduction

---

BigBoys Industry (BBI) is an open blockchain protocol founded in 2020 by Via East West Capital (VEWC)

VEWC has launched a new blockchain commodity trading platform called 'BigBoys Industry'. This all-new investment platform is equipped with tools that enable our investors to monitor and deploy mining operations directly through our dashboard to real-world mining facilities, generating real-time mineral resources across the globe.

Today, the mineral supply chain suffers from complex issues that have multi-faceted causes, a lack of transparencies towards investors within commodity trading, and an increasing amount of environmental regulatory challenges.

Investors & Commodity Traders who trade Gold at market price will be able to use the new 'BigBoys Industry' platform to invest and trade gold at production price, which is significantly lower than market price.

Via East West Capital (VEWC), has digitized these gold mines into blockchain. All mineral resources produced at our Gold Mining facilities will be publicly visible to all investors and on our supply chain. Facilitating the companies and investors that we work with, the ability to access sensitive information securely & transparently, ranging from production data, profit and even other mineral resources to be traded.

# Overview

---

VEWC has digitized mineral production from mining facilities, allowing for all commodities produced to be registered automatically on our commodity trading platform. Investors will be able to invest in the mine with our cryptocurrency known as the BBI Token.

The BigBoys Industry platform will allow investors to trade and sell their commodities online using the BBI Token, which is backed by the gold produced from our mining facilities. Each BBI Token has innate value based on how much gold is produced and backed into the bank's repository. Alternatively, investors can visit the mine and redeem their BBI Token for its gold equivalent.

Our commodity trading platform BigBoys Industry gives our investors the freedom of currency with the security of a commodity. Investors have the freedom to personally travel and export the gold allocated to them through the investment pay out dividends.

Alternatively, we provide a service where the investor can deposit the Gold Bar into a Gold Bullion safe deposit with our local central bank partners in return for a gold certificate bond which they can use at any financial institution across the globe.

# Chapter 1

---

## Tokenize Gold Mine with BBI Token.

The gold is digitized into the blockchain. The BBI Token are digital assets which are backed by real-time production of precious metals, such as gold, from our mining facilities.

These digital assets can be sold & traded by investors based upon the market price of gold. Besides this, investors can seek the option of bringing back their gold.

These digital assets are highly stable and transparent, significantly reducing the risk of fraud.

## Chapter 2

### Fraud Resistant

The BBI blockchain is an unalterable record of all transactions, removing the risk of forgery and providing investors with the ability to create an immutable chain of custody. Investors can create self-governed incentive systems without the risk of bad actors spoiling the transaction.

This system allows low trust, high-profit transactions to be executed at a greatly reduced risk.

Investors can track their gold through BBI Tokens ERC20 Ethereum Blockchain Explorer. The tokens are trackable from the first day, it was purchased, sold or exchanged between 2nd or 3rd parties etc

## Chapter 3

### How It Works:

First, the minerals are mined, then they are sent to a refinery. The entire process is recorded with VEWC and Smart Mining Technology. All vehicle are programmed to move according to GPS tracking. The ore that is sent into the processing area is strictly weight and recorded into VEWC blockchain to allow investors to see the status of mining production on BigBoys Industry platform.

After that, the end product Gold Bar would be deposited to a partnered bank, in conjunction with recording and placed on the BBI Token ERC20 Blockchain.

VEWC allows investors to easily translate the minerals, like gold, as a digital asset (BBI). Which can be stored in a digital wallet and moved around like cash. The transportation of physical precious metal is a complex and challenging procedure, so our digitization will ease this burden for investors hence.

We are proud of the infrastructure we have created, and the value of the BBI Token.

# 194 Acre Mine Income & Investment Explanation

All data and calculations are based on a 10 hour working day & the minimum production capacity of 15 KG. Statistically, we will have more than 20-25 KG per month.

**Mine Substantial: Gold**  
**Symbol: Au**  
**Element: #79**

## \$176,277,000

3000 KG Estimate Complete in 7-8 Years

## 15 KG

Minimum Monthly  
Guarantee Return

## \$58,759

Prices are subject to  
change depending on  
market.

# Profit Sharing

## 50%

Investors will receive 50% of Gold production after deducting operation cost

## 50%

Mine operator, land lord, Mining License holder will receive 50% of gold production after deduct operation cost

# Necessary Investment Break Down

## \$9,300,000

Total of Investment.

### \$4,218,000

Fund allocated to purchase Mining Machinery & Vehicles.

### \$1,992,000

Fund allocated to build Mining Facility, Washing Plant, Hostel, Canteen & Storage

## \$3,000,000

Procedure Fees, License fees, Smart Mining technology to allow investors have real time surveillance on mining production, and access to supervise all the vehicle GPS tracking, conveyor belt tension & weight measure.

# Monthly Guarantee Return

**\$290,737**

Investors Receive

**\$290,737**

Mine Operator Receive

Break down:

**15 KG x \$58,780.41 = \$881,392**

(Price Per KG = \$58,780.41)

**\$881,392 - \$299,917 = \$581,475**

(Monthly Expense = \$268,653)

**\$581,475 / 2 = \$290,737**

## Guarantee Return In Percentage

### Monthly Expenses Break Down (USD)

# Estimation Wages Break Down

# 343.7 Acre Mine Income & Investment Explanation

All data and calculations are based on a 10 hour working day & the minimum production capacity of 15 KG. Statistically, we will have more than 20-25 KG per month.

**Mine Substantial: Gold , Lead , Manganese**  
**Symbol: Au , Pb , Mn**  
**Element: #79 , #82 , #25**

## \$235,036,000

4000 KG Estimate Complete in 8-11 Year

## 15 KG

Minimum Monthly Guarantee Return

## \$58,759

Prices are subject to change depending on market.

# Profit Sharing

## 50%

Investors will receive 50% of Gold production after deducting operation cost

## 50%

Mine operator, land lord, Mining License holder will receive 50% of gold production after deducting operation cost

# Necessary Investment Break Down

## \$12,629,000

Total of Investment.

## \$5,381,000

Fund allocated to purchase Mining Machinery & Vehicles.

## \$3,248,000

Fund allocated to build Mining Facility, Washing Plant, Hostel, Canteen & Storage

## \$4,000,000

Procedure Fees, License fees, Smart Mining technology to allow investors have real time surveillance on mining production, and access all the vehicle GPS tracking, conveyor belt tension & weight measure.

## Monthly Guarantee Return Gold

**\$290,737**

Investors Receive

**\$290,737**

Mine Operator Receive

Break down:

**15 KG x \$58,780.41 = \$881,392**

(Price Per KG = \$58,780.41)

**\$881,392 - \$299,917 = \$581,475**

(Monthly Expense = \$268,653)

**\$581,475 / 2 = \$290,737**

## Monthly Guarantee Return Lead

**\$1,980,850**

Investors Receive

**\$1,980,850**

Mine Operator Receive

Break down:

**2000 TON x \$1,980.85 = \$3,961,700**

(Price Per KG = \$1,980,85)

**\$3,961,700 / 2 = 1,980,850**

## Monthly Guarantee Return Manganese

**\$250,000**

Investors Receive

**\$250,000**

Mine Operator Receive

Break down:

**5000 Metrics TON x \$100 = \$500,000**

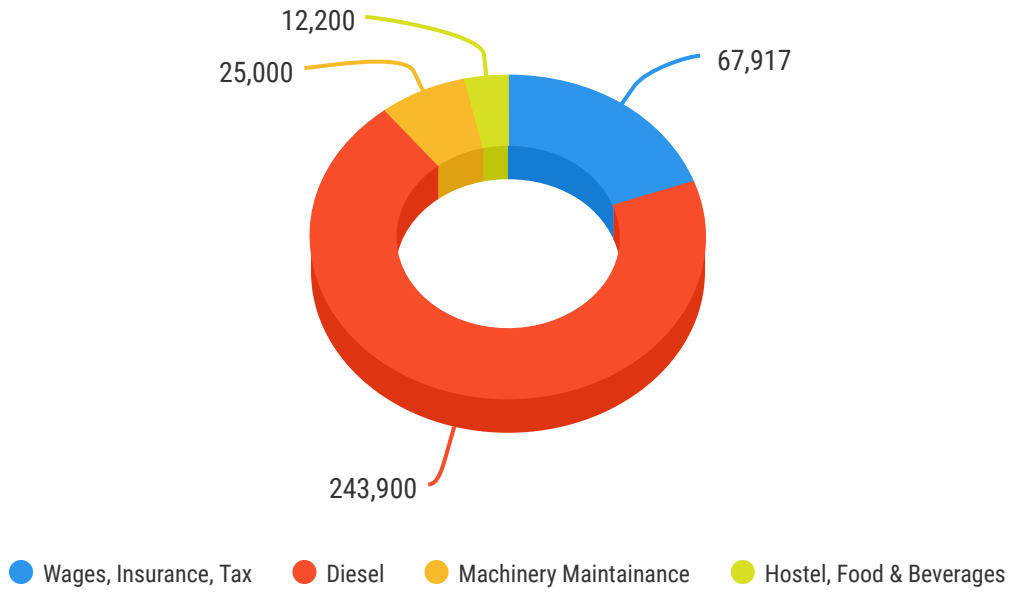

(Price Per Metrics TON = \$100)

**\$500,000 / 2 = \$500,000**
